

Technical Verification Report

Web Developer Assessment (Laravel Mini-CRM)

Candidate Name	Alif Aiman Bin Mansor
Target Role	Software Developer & IT Executive
Submission Date	13 September 2026
Repository Visibility	Public
GitHub Repository Link	https://github.com/aalfmnsrr/FNXperts-IT-Assessment.git

1 Executive Summary & Assessment Brief Compliance

This technical documentation accompanies the submission of the Mini-CRM assessment built for FNXPPTS. The application implements complete administrative management for corporate profiles and employee rosters using Laravel. It features restricted role authentication, dedicated request validation rules, Eloquent schema associations, asset symlink storage, and an API endpoint formatted via JSON Resources.

2 Step-by-Step Local Setup & Reproduction Guide

2.1 Prerequisites

- PHP $\geq$ 8.2 (required extensions: pdo_mysql, mbstring, fileinfo)
- Composer $\geq$ 2.x
- Node.js $\geq$ 18.x and NPM
- MySQL Server $\geq$ 8.0

2.2 Installation Steps

1. Clone the repository:

```
git clone https://github.com/aalfmnsrr/FNXperts-IT-Assessment.git
cd FNXperts-IT-Assessment
```

2. Install PHP and JavaScript dependencies:

Assessment Requirement	Implementation Details	Status
Basic Authentication	Laravel Breeze starter kit with public registration routes disabled.	Compliant
Database Seeder	AdminUserSeeder seeds initial user admin@admin.com / password.	Compliant
Companies CRUD	Full CRUD: Name (required), Email, Logo (min 100x100), Website.	Compliant
Employees CRUD	Full CRUD: First/Last Name (required), Company FK, Email, Phone.	Compliant
Eloquent Relationships	Company hasMany Employees; Employee belongsTo Company.	Compliant
Public Logo Storage	Assets saved to storage/app/public/logos; exposed via storage:link.	Compliant
Validation & Pagination	Custom Form Requests; listings paginated at 10 entries per page.	Compliant
Resource Controllers	Standard resource controllers implemented for Companies and Employees.	Compliant
API Route & Response	GET /api/companies/{id} returns company, employees, and employee_count.	Compliant
API Testing	Verified via Postman client with Accept: application/json header.	Compliant

Table 1: FNXPPTS Assessment Brief Compliance Matrix

```
composer install
npm install
```

3. Configure the environment file:

```
cp .env.example .env
php artisan key:generate
```

4. Set up the database connection: Configure database parameters within the .env file:

```
DB_CONNECTION=mysql
DB_HOST=127.0.0.1
DB_PORT=3306
DB_DATABASE=mini_crm
DB_USERNAME=root
DB_PASSWORD=
```

5. Run migrations and database seeders: This runs schema migrations and seeds the default administrator account:

```
php artisan migrate --seed
```

6. Create the storage symlink: Links storage/app/public to public/storage for logo accessibility:

```
php artisan storage:link
```

7. Compile front-end assets:

```
npm run build
```

8. Start the local development server:

```
php artisan serve
```

The system will be accessible at <http://127.0.0.1:8000>.

2.3 Default Administrator Credentials

Parameter	Value
Login URL	http://127.0.0.1:8000/login
Default Email	admin@admin.com
Default Password	password

Table 2: System Initial Access Credentials

3 API Documentation & Testing Instructions

The application provides a dedicated API route returning a single company resource along with all associated employee records and the computed staff count.

- **HTTP Method:** GET
- **Endpoint:** /api/companies/{id}
- **Required Headers:** Accept: application/json

3.1 Sample Response Payload (200 OK)

```
{
  "data": {
    "id": 1,
    "name": "Universiti Teknologi Malaysia",
    "email": "utm@example.com",
    "logo": "http://127.0.0.1:8000/storage/logos/sample.png",
    "website": "https://utm.my",
    "employee_count": 1,
    "employees": [
      {
        "id": 1,
        "first_name": "Jane",
        "last_name": "Doe",
        "email": "jane@utm.my",
        "phone": "+60123456789",

```

```
    "created_at": "2026-09-12T00:00:00.000000Z",  
    "updated_at": "2026-09-12T00:00:00.000000Z"  
  },  
],  
"created_at": "2026-09-12T00:00:00.000000Z",  
"updated_at": "2026-09-12T00:00:00.000000Z"  
}
```

4 Visual Evidence & Screenshots Log

The visual captures below demonstrate interface functionality, data validation, and API testing.

Figure 1: Admin Authentication

Login screen with self-registration routes completely disabled.

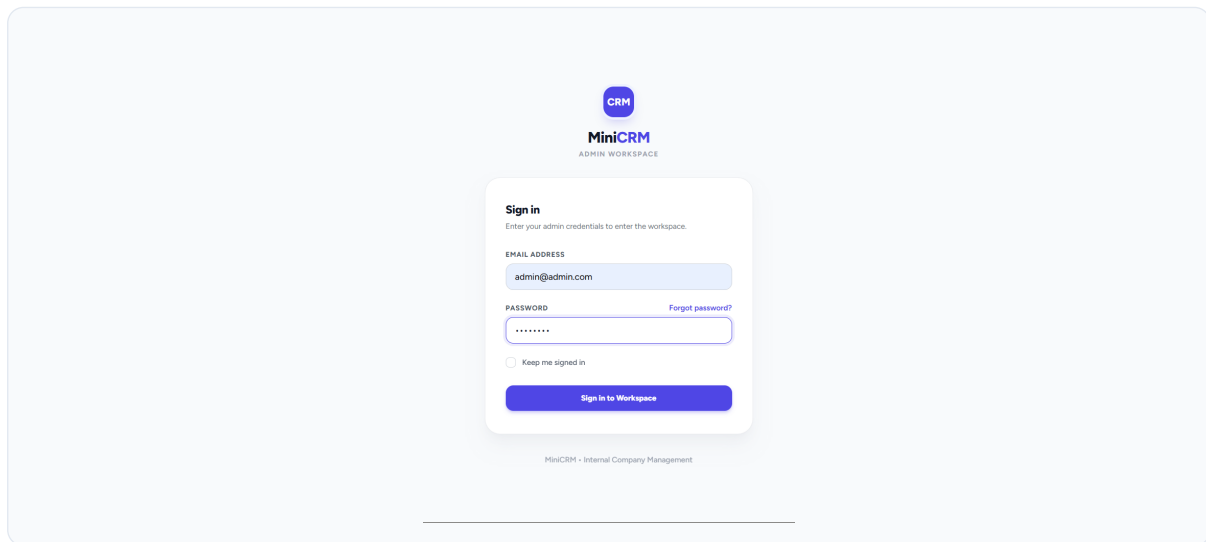

Figure 2: Companies Directory

List view displaying logo thumbnails, website links, employee counters, and 10-item pagination.

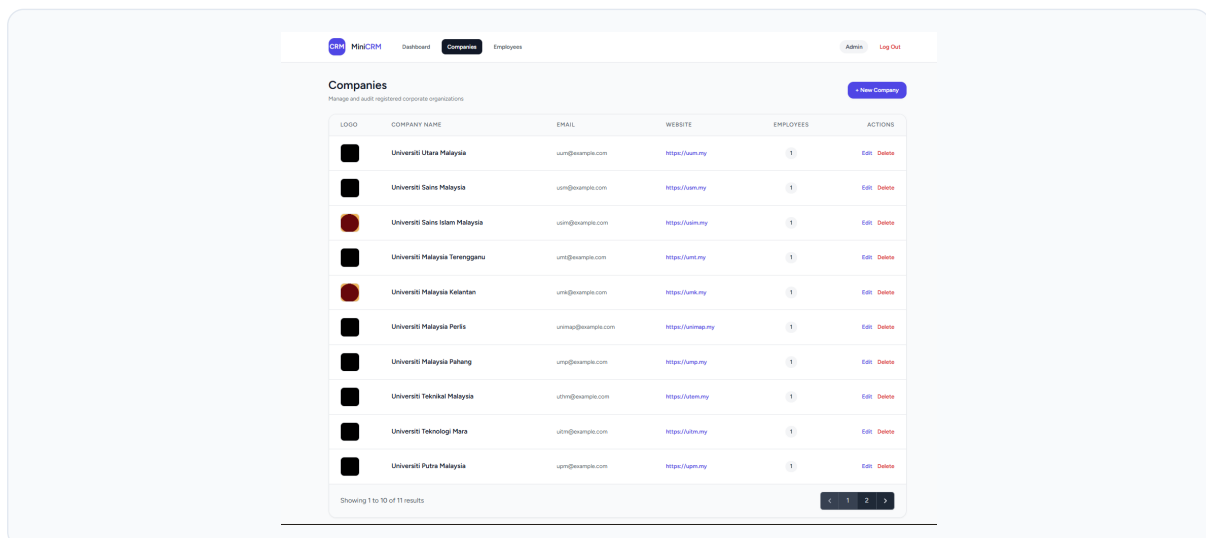

Figure 3: Company Creation Form
Create interface featuring logo file selection, dynamic preview, and 100x100 validation.

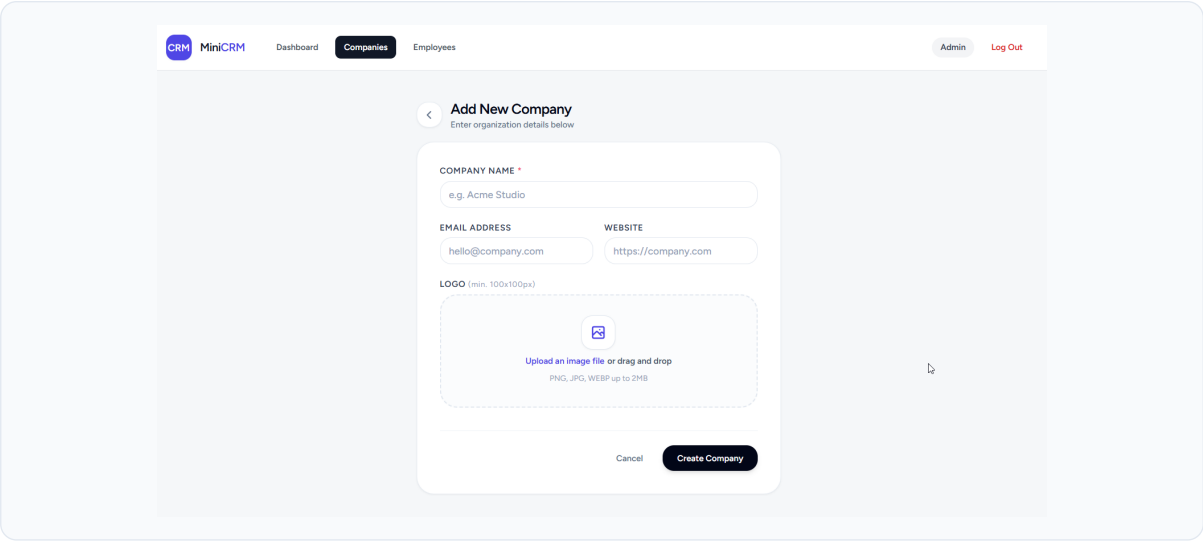

Figure 4: Company Profile Show View
Detailed view of a company profile with the roster of assigned employees.

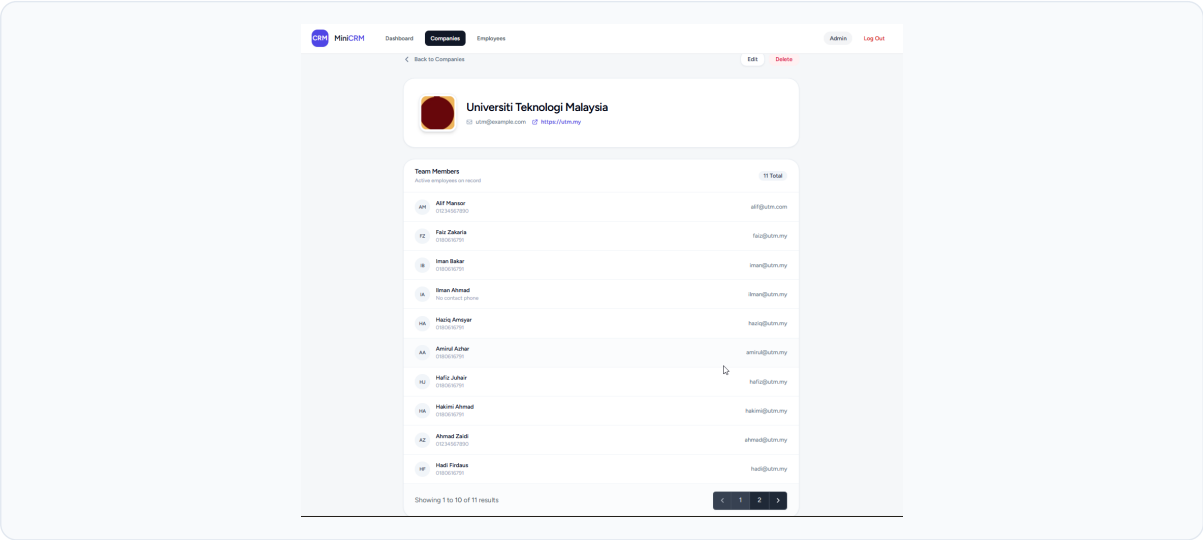

Figure 5: Employees Directory
Personnel table showing company affiliations, phone records, and pagination controls.

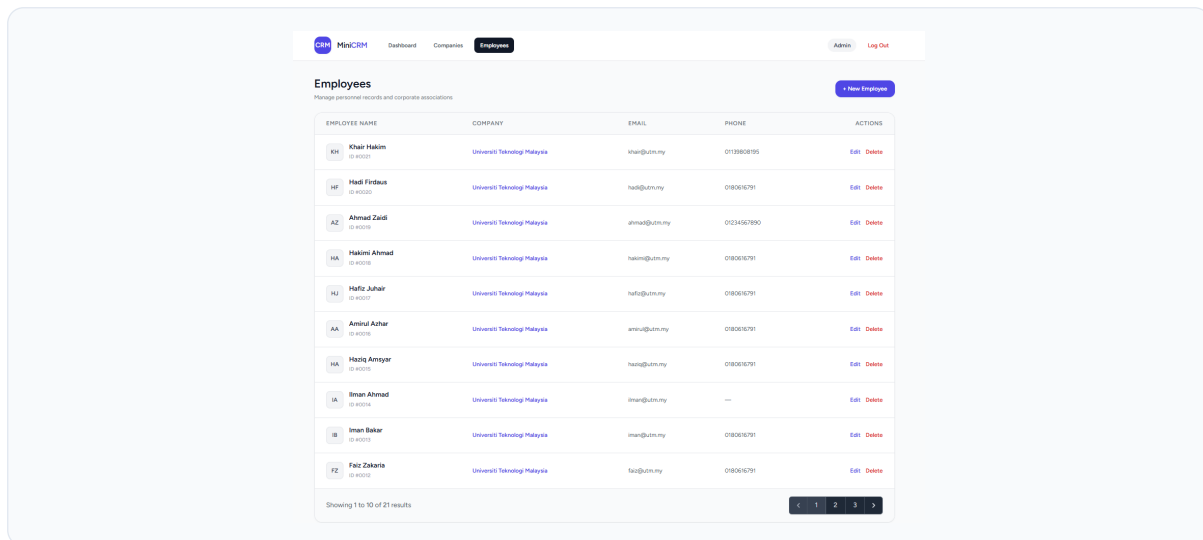

Figure 6: Employee Creation Form

Employee onboarding form with company relational dropdown.

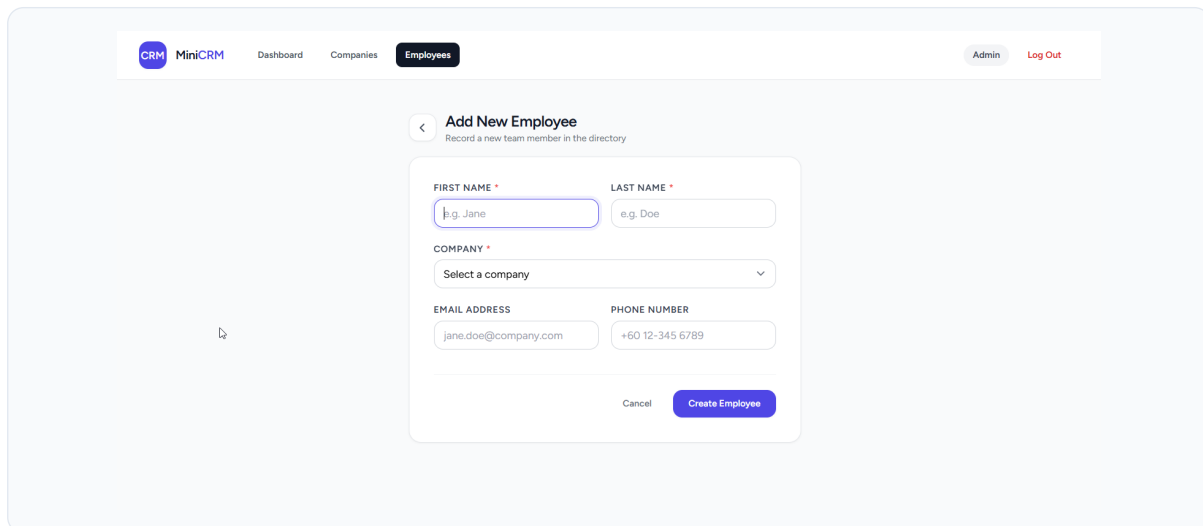

Figure 7: Postman API Test

Successful GET /api/companies/{id} execution demonstrating HTTP 200 and employee_count.
